2026 June

Passing on the Vision

In mid June we organized an introductory CHE training in the Roma community of Nyíradony. This a place in eastern Hungary, the region where one of our workers is living. He has been involved in this community for many years, working together with a local Roma pastor, attempting to establish a community there, trying to do community projects to raise people's interest. But up till this year it seemed not very fruitful.

Until **all of a sudden God started moving with the wind of His Spirit!** Since the beginning of this year a steady group of Roma is coming together every week to worship God and to study His Word. Every time I went there – usually one Saturday a month – there was **eagerness and spiritual hunger for God's Word!** It was always a joy to go there.

The local pastor and I discussed the opportunity of organizing a

CHE Vision Seminar for people in the newly planted church. The goal of this is to get people acquainted with the main principles of Community Health Evangelism, to teach them about development of the community and about the wholistic ministry that Jesus had when He was in this world, and how we are to follow Him in that.

Also how **poverty is so much more than just the lack of things, but rather the lack of healthy relationships.**

A Vision Seminar is only a foretaste of a TOT (Training of Trainers) CHE training. The idea is to disciple people into wholistic ministry in community development, in order that they themselves may become able to teach others. In that way the CHE strategy becomes a self-multiplying strategy; just like the Gospel itself is.

We got permission to use a room in the local reformed church, and about twelve Roma – men and women – came together for this training. At first they were a bit shy, but when they

experienced the easy going teaching style of CHE, they became more involved.

We hope and pray that this seminar has **raised interest and desire to learn more about this strategy and about God's plan for this community**, and holy discontent about the current situation of poverty and brokenness of the community.

You can partner with your MEK Team by praying...

- *that God will work in the hearts of these participants, that Spirit guided leaders may stand up in this community and that God's plan of restoration may become reality among them and through them, so that a healthy community may develop for God's glory.*
- *for preparation for the summer camps in Apc and Zsámbok.*
- *that God is already beginning to open the hearts of those who will attend camps, that they will be drawn to him.*
- *for those who will be serving in the camps, for God's protection, for good health, and that we will be tools in His hands.*
