

# Philippines – Creation Care Practitioners

## Job Description:

Passionate about caring for the environment or livestock farming or gardening or creating products using recycled materials etc.? Serve God in the Philippines in practical ways. We are looking for people who have experience in creation care, farming and agriculture and use those skills to reach locals for Christ.

- Short-term: If ministry or Business as Mission already established, 3 weeks or 3–6 months.
- Long-term: If you will start up the ministry, 1–3 years or more (short-term exposure of 2–3 months required).

## Responsibilities (*depending on your experience and passion*):

### Chicken / Livestock Farming

We currently have a little chicken farm where we do chicken farming as a community development initiative.

- If you have experience in backyard chicken farming or livestock farming, help a local ministry team implement good farming practices to increase production for fundraising (selling of livestock) so we can give away livestock to locals who want to be trained to produce their own food and alleviate poverty.
- Help train locals in the community to propagate their own backyard chicken farm to alleviate poverty and start Bible studies through this community development initiative.
- Possibly invest resources to improve or enlarge this ministry.

### Creation Care Start-ups:

#### Community Garden Ministry

- If you have experience in successful gardening and agriculture, work with local believers to start a community vegetable garden to help provide food for communities.
- Build meaningful relationships with local non-believers through gardening and bring Jesus in their lives as well as disciple them in organic and creative ways.
- Invest resources to this ministry startup and missional platform/strategy as well.

#### Trash to Riches Ministry

- Work with local believers to mobilize communities to take care of the environment through environmental care initiatives (pick up trash near the ocean and recycle the plastics) and start up a business as mission (BAM) that recycles trash as a community development project.
- Reach out to the local community through this creation care ministry.
- Encourage and mentor local believers and churches to use creation care activities as a strategy for local outreach.
- Invest resources to this ministry startup and missional platform/strategy as well.
